

Human control plane over every client AI that can draft a privileged system-of-record write.

Close = named dual seats ×proof day ×signed L1 ×P-ADM attach. Insulation = independence × Job C lockfile ×fail-closed gold ×catalog law. Packet = catalog list ×zero booked × two-human close.

RECOGNIZED REVENUE	NAMED CUSTOMERS	SIGNED L1	YEAR-ONE IF ALL THREE
\$0	0	0	\$88,000?\$135,000

PROBLEM

Client Copilot, Agent 365, BYO models, and the client’s customers’ AI can draft a Dynamics 365 Business Central journal. Controllers have segregation of duties. They do not have a gate in front of the write. A Teams vote, a PIM activation, or Copilot asking a human is not dual admit.

SOLUTION

Job C: two distinct humans bind the same action_hash. The grant is consumed once. The effect is fail-closed. No admit, no write. AINav is not the client’s AI. It is the independent human failsafe and control plane: off switch, reset, rollback, first and second records.

BUSINESS MODEL

Prove with L1. Keep with P-ADM after kit PASS. Deepen with paid U-DUAL. Packs, hours, and Microsoft licenses are not SKUs. U-DUAL is never free. Catalog list. Not booked. Not ARR. Not a forecast. No billing provider.

SKU	Role	Catalog list	Term
L1	prove	\$28,000?\$40,000	2?4 weeks
P-ADM	keep	\$40,000?\$60,000	annual
U-DUAL	deepen	\$20,000?\$35,000	annual

WHO BUYS • WHY NOW

Dynamics 365 Business Central Premium. Microsoft Entra ID. Existing two-person journal SOD. The client utilizes AI. Their customers do too. Do not invent a named buyer.

Every new client AI is another unauthorized-write surface. The buyer is the controller who already has Business Central Premium, Entra, and two-person journal SOD. They institute AINav. They do not replace their ERP.

Unit economics, insulation, ask

Catalog list only. Zero booked. Two-human close.

IF-THEN CATALOG LIST ? NOT A FORECAST

Scenario	If	List
One controller ? L1 only	One controller buys L1 and stops.	\$28,000?\$40,000
One controller ? L1 then P-ADM	One controller buys L1, kit PASS, then attaches P-ADM.	\$68,000?\$100,000
One controller ? all three SKUs	One controller buys L1, attaches P-ADM, then pays for U-DUAL.	\$88,000?\$135,000
Three controllers ? L1 + P-ADM eac	Three controllers each buy L1 and attach P-ADM. No named buyers exist.	\$204,000?\$300,000
One L1 plus four FFS days	One controller buys L1 and four billable days on the same plane.	\$42,000?\$54,000

INSULATION

The vendor of the AI cannot credibly sit over that AI as the failsafe. Lockfile stays job_c. Gold is fail-closed. Catalog law refuses competitor SKUs. This is not a patent. This is not uncopyable. G12 stays open.

TRACTION ? HONEST

Admit plane in code. Gold above 90 percent. Business Central Sandbox company AINav. Sandbox journal AINAV-L1. Institute hosted on Azure, not launched. Production blocked. Named customers: none. Recognized revenue: none.

THE ASK

Cynthia Hodnett as seat B and Inception business executive. Own mailbox. Own click. Not stock. Not Global Admin. Not a priced round. Not LIVE_PIN_OK.

HIGHLIGHTS

? Three SKUs only. Year-one catalog list if one controller buys all three: \$88,000?\$135,000.
 ? L1 \$28,000?\$40,000 in two to four weeks. Ninety-minute proof day on the twin.
 ? P-ADM \$40,000?\$60,000 / year after kit PASS. U-DUAL \$20,000?\$35,000 / year, never free.
 ? Fee-for-service \$3,500/day on the same plane after L1. Hours are not a SKU.
 ? Independence from Microsoft, Copilot, Agentforce, Joule, and Now Assist.

THIS PACKET REFUSES

priced round • invented valuation • forecast ARR • named customer • LIVE_PIN_OK • equity grant • uncopyable • patent granted

Investor-grade packet for the invited second human. Not a raise. Not a forecast. Not a contract. Not LIVE_PIN_OK.
