Human control plane over every client AI that can draft a privileged system-of-record write.

Close = named dual seats ×proof day ×signed L1 ×P-ADM attach. Insulation = independence × Job C lockfile ×fail-closed gold ×catalog law. Packet = catalog list ×zero booked × two-human close.

RECOGNIZED REVENUE	NAMED CUSTOMERS	SIGNED L1	YEAR-ONE IF ALL THREE
\$0	0	0	\$88,000?\$135,000

PROBLEM

Client Copilot, Agent 365, BYO models, and the client’s customers’ AI can draft a Dynamics 365 Business Central journal. Controllers have segregation of duties. They do not have a gate in front of the write. A Teams vote, a PIM activation, or Copilot asking a human is not dual admit.

SOLUTION

Job C: two distinct humans bind the same action_hash. The grant is consumed once. The effect is fail-closed. No admit, no write. AINav is not the client’s AI. It is the independent human failsafe and control plane: off switch, reset, rollback, first and second records.

WHO BUYS • WHY NOW

Dynamics 365 Business Central Premium. Microsoft Entra ID. Existing two-person journal SOD. The client utilizes AI. Their customers do too. Do not invent a named buyer.

Every new client AI is another unauthorized-write surface. The buyer is the controller who already has Business Central Premium, Entra, and two-person journal SOD. They institute AINav. They do not replace their ERP.

HOW THE SALE WORKS

Qualify an ICP controller who already has Business Central Premium, Entra, and two-person journal SOD. Generate a proof-day brief they can forward. Ninety minutes on the twin. Sell L1 that week. Kit PASS. Attach P-ADM. Offer paid U-DUAL. Seat priced desks on the same plane. Exits: LOST, KIT_FAIL, CHURN. Do not invent a contact inbox or a design-partner name.

WHAT A TUESDAY LOOKS LIKE

Seat A is treasury_approver (James). Seat B is treasury_controller (Cynthia, if she agrees). Each has a distinct Entra object id. When a privileged write is proposed, both see the same action_hash. Admit or refuse. Refusing is the product working. James clicking twice is not dual. The Cloud Agent is not a seat.

BUSINESS MODEL ? THREE SKUS ONLY

Prove with L1. Keep with P-ADM after kit PASS. Deepen with paid U-DUAL. Packs, hours, and Microsoft licenses are not SKUs. U-DUAL is never free. Catalog list. Not booked. Not ARR. Not a forecast. No billing provider.

SKU	Role	Catalog list	Term
L1	prove	\$28,000?\$40,000	2?4 weeks
P-ADM	keep	\$40,000?\$60,000	annual
U-DUAL	deepen	\$20,000?\$35,000	annual

UPSELL CATALOG ? NOT A FOURTH SKU

Investor packet

Confidential • For Cynthia Hodnett • From James Hodnett • Release 2.20.0

Desks, libraries, and fee-for-service hours deepen the same three SKUs. They are not a fourth product. U-DUAL is never free with P-ADM. Hours never attach U-DUAL. Included packs are seating, not a discount on a second control plane.

INSULATION

The vendor of the AI cannot credibly sit over that AI as the failsafe. Lockfile stays job_c.
Gold is fail-closed. Catalog law refuses competitor SKUs. This is not a patent. This is not uncopyable. G12 stays open.

TRACTION ? HONEST

Admit plane in code. Gold above 90 percent. Business Central Sandbox company AINav. Sandbox journal AINAV-L1. Institute hosted on Azure, not launched. Production blocked. Named customers: none. Recognized revenue: none.

THE ASK

Cynthia Hodnett as seat B and Inception business executive. Own mailbox. Own click. Not stock. Not Global Admin. Not a priced round. Not LIVE_PIN_OK.

HIGHLIGHTS

? Three SKUs only. Year-one catalog list if one controller buys all three: \$88,000?\$135,000.
