

Release 2.10.0 • For Cynthia Hodnett • From James Hodnett

Printable. Catalog-honest. Not a contract. Not signed L1. Not LIVE_PIN_OK.

Confidential briefing for Cynthia Hodnett • From James Hodnett, sole owner of AINav, Inc. • Release 2.10.0 • Printable. Not a contract. Not signed L1. Not LIVE_PIN_OK.

The ask, in one sentence

James Hodnett is building a company that will not let a privileged money-movement write land unless two distinct humans admit it. He can write the software. He cannot be both humans. We are asking Cynthia Hodnett to be the second human ? seat B ? with her own business email and her own click. Not stock. Not Global Admin. Not this Cloud Agent.

What we are building together

AINav, Inc. is a Delaware C corporation. The product is the AINav Control Plane. AINAV.Institute is the public law of that plane. Microsoft hosts, identifies, notifies, and receives the write after two humans admit it. Microsoft is not the product. Teams is not a seat. Copilot is not the admit plane. A Cloud Agent can operate the host; it cannot be seat A or seat B.

The job is Job C: dual-admitted effect authority before a Dynamics 365 Business Central general-journal post that two humans did not admit. Two distinct people bind the same action hash. That grant is consumed once. The effect gate is fail-closed. If either human is missing, the write does not land.

We sell three things only. L1 proves the gate in two to four weeks (\$28,000?\$40,000). P-ADM keeps the same plane covered after kit PASS (\$40,000?\$60,000 / year). U-DUAL deepens the same plane onto Sales (\$20,000?\$35,000 / year) and is never free. Packs, hours, and Microsoft licenses are not products. A controller buys the commercial close: named dual seats ×proof day ×signed L1 ×P-ADM attach. The lab pin LIVE_PIN_OK is a separate engineering fact and is never marked from a sale.

Why we need you

James Hodnett is the sole owner and one human principal. Job C cannot close with one human. NVIDIA Inception also wants two unique contacts with business emails ? a developer and a business executive. Sole owner does not collapse that. You are the invited second human. You are not recorded as an officer. You are not a stockholder. No email is stored until you agree and James says record it.

Without a second distinct person who actually clicks, AINav can keep a lab. It cannot sign L1, apply to Inception, or tell a controller that two humans admitted the journal. That is why this brief exists, and why your yes or no matters before anything else.

Your role if you agree

Seat B ? treasury_controller. James is seat A ? treasury_approver. Inception ? business_executive. James is the developer / programmer. You receive your own @ainav.institute mailbox and your own Entra identity. Not an alias. Not Gmail. Not his login. When a privileged write is proposed, you review the action hash and admit or refuse. If he clicks both seats, it is not dual. If you rubber-stamp without reading, it is not dual.

You do not need Global Admin. You do not need equity in the C corp to do this job. You

do not become Copilot, Teams, or this Cloud Agent. Available tools are not seats. A chat is not a seat. A PIM activation is not dual admit. Counsel decides stock later. This brief does not issue shares.

What you are not being asked

You are not being asked to buy a customer. You are not being asked to mark LIVE_PIN_OK. You are not being asked to launch ainav.institute. You are not being asked to enable Business Central Production. You are not being asked to sign a counsel pack today. Those remain owner gates and stay open until James authorizes them in his own words.

How the three names fit

AINav, Inc. is the company. AINav Control Plane is the product. AINAV.Institute is the public face. Master mothership issues the lockfile and never writes a client system of record. Cloud and local motherships share one consume ledger. Azure, Microsoft 365 E7, Business Central Premium, Sales Enterprise, and Teams Premium are the fabric. They receive the write after you and James admit it.

What happens next

1. You decide. 2. If yes, James creates your mailbox and you sign in once. 3. He sends this agent your business email and says record it. 4. Proof day uses two named humans on the twin ? still not Production. 5. Equity, officer titles, and Delaware filings stay with counsel.

Invited: Cynthia Hodnett • Recorded: no • Email: none stored • Equity: no • Operator: cursor.cloud_agent (not a seat) • Second officer: none
